

## Background Information:

An accurate diagnosis is an important tool for disease treatment, without which our knowledge of veterinary medicine would be sorely lacking. An accurate and in time diagnosis with clinical reasoning is important and primary goal of medicine. An Accurate, efficient, and comprehensive justifiable diagnosis is key to inform treatment strategies and practices that itself is vitally important to the future health and welfare of any species in question. Therefore, Department of Pathology, University of Veterinary and Animal Sciences Lahore, Pakistan is organizing one day workshop entitled “**1st workshop on the impact of interpretations of hematological investigations for disease diagnosis**”.

## Objective:

Main objective of this workshop is to equip the postgraduate students, young faculty and field veterinarians from public and private sector to formulate/contribute to a correctly prioritize relevant diagnosis including can't miss diagnosis based on hematological investigations.
